

Growing & Shipping the  
world's finest Summer citrus.

# For 20 years, our growers have been providing the best tasting summer citrus available.

Our fruit is grown in the Western & Northern Cape regions of South Africa where it thrives in Mediterranean-like growing conditions. This special climate provides steady, moderate temperatures that result in increased natural fruit sugars for a superior citrus eating experience.

Summer Citrus from South Africa is available during the U.S. summer season June - October.
